Median value of owned homes & median rent	47
Average visitor census	48
IV. Index of Agencies & Organizations Cited	49

Data Highlights

Most of the statistics for Honolulu County mirrored the statewide statistics with the exception of the following:

☐ Demographics

In 2000 the proportion of Chinese, Japanese and “other” ethnic groups was slightly greater than the State proportion, while the proportion of Caucasians and Hawaiians was slightly less than the State proportion.

In 2000 resident population density was 1460.8 per square mile whereas the State rate was only 188.6 per square mile.

☐ Social Profile

Data similar to statewide

The proportion of families headed by females with children under 18 increased at a somewhat slower rate than the State.

While the child abuse rates have been consistently less than the State rate for the years 1990 to 1999, the rate of increase between 1998 and 1999 was significantly higher for the County than the State.

☐ Economic Profile

Per capita personal income has been about \$2000 more for Honolulu residents than others in the State for the past eight years.

In 1999, the median income for Honolulu households was \$2,094 more than statewide; similarly, the family median income was \$3,157 more.

In both 1999 and 2000, a smaller percentage of visitors to Honolulu County were from the U.S. than statewide (60% vs. 73%) and a larger percentage were international visitors (40% vs. 27%).
